

Plantroom Design Made Easy

Our approach to plantroom design is the most cost effective on the market.

These are a few key points:

- Our plantrooms are drafted in **3 dimensions** which offer many advantages like:
 - **Easy interpretation** of the space ,equipment and access
 - There is **no limit** to the number of sections that can be generated instantly
 - **Time on site** is kept to a minimum as the drawings are far more accurate and clearer to read
 - **Better interpretation and accuracy** results in fewer variation expenses
 - Clear views can be shown in O&M Manuals for **quick interpretation and fault finding**

Modulising (see above) has proven to be highly effective by:

- **Keeping difficulties in the shop**, not on site
- Keeping site **staff to a minimum**
- Reducing crange and heavy **lifting times to a minimum**
- Giving **piece of mind** as one knows, prior to delivery, that all services are co-ordinated
- **Eliminating variation costs** since the plantroom is preassembled
