

3D SHOP DRAWINGS

Design data can be taken directly from the model to produce accurate 3D Shop Drawings. This gives you clear and quick access to information with minimal effort.

CONTROL INFORMATION

Understand your project's exact status in real time, 24/7. Changes can be made quickly, before costs are incurred. Conflicts are identified early, reducing RFI's and change orders during construction.

FACILITIES MANAGEMENT

By keeping all building systems and equipment current, functional, and secure, building owners save millions of dollars every year. A powerful tool any client will want.
